

Hook mating nets: White, move 24

Hook mating nets

White to move

Previous move: 23...Rae8. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

24. Re6+ Rxe6 25. Rxe6#

24.Re6+ Check restricts Black to 1 legal reply here. From e6 it attacks king on f6, rook on e8 and bishop on c6.
Recorded reply: **24...Rxe6**.

25.Rxe6# Mate: rook on e6 gives check; Black has no legal reply.

The line ends in checkmate against the king on f6. Material gain is unnecessary once no legal defense exists.

CHECKPOINT

Which piece delivers the final check, and why can the defender not continue? **Answer:** Rook on e6. The king is in check and the position has zero legal replies.

CARRY THE IDEA INTO YOUR GAMES

Recount the king's legal replies after each move. A changed pawn placement can destroy an otherwise familiar mating pattern.

WHAT THIS POSITION TEACHES

A hook-type mating net combines rook pressure with knight control and supporting pawn geometry. The supporting pieces can matter more than the apparent value of a sacrifice.

HOW TO LOOK

Identify the final checking line and then trace which friendly pieces protect the attacker and control the king's exits.

The defending king is on f6. Look for a defender that can be displaced or overloaded.
