

Hook mating nets: Black, move 23

Hook mating nets

Black to move

Previous move: 23.Rxg7. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

23...Rd1+ 24. Kg2 Ne1+ 25. Kf1 Nf3+ 26. Ke2 Re1#

23...Rd1+ Check restricts White to 1 legal reply here. From d1 it attacks king on g1 and bishop on c1. Recorded reply: **24.Kg2**.

24...Ne1+ Check restricts White to 3 legal replies here. The changed line means the rook on c3 attacks the bishop on c1. Recorded reply: **25.Kf1**.

25...Nf3+ Check restricts White to 2 legal replies here. The changed line means the rook on d1 attacks the king on f1. Recorded reply: **26.Ke2**.

26...Re1# Mate: rook on e1 gives check; White has no legal reply.

The line ends in checkmate against the king on e2. Material gain is unnecessary once no legal defense exists.

CHECKPOINT

Which piece delivers the final check, and why can the defender not continue? **Answer:** Rook on e1. The king is in check and the position has zero legal replies.

CARRY THE IDEA INTO YOUR GAMES

Recount the king's legal replies after each move. A changed pawn placement can destroy an otherwise familiar mating pattern.

WHAT THIS POSITION TEACHES

A hook-type mating net combines rook pressure with knight control and supporting pawn geometry. The supporting pieces can matter more than the apparent value of a sacrifice.

HOW TO LOOK

Identify the final checking line and then trace which friendly pieces protect the attacker and control the king's exits.

The defending king is on g1. Geometrically undefended: rook on g7 and rook on b6. Check for tactical protection.
