

Discovered attacks

WHAT THIS POSITION TEACHES

Find a friendly piece between a slider and an enemy target, then inspect its forcing moves and captures.

The defending king is on b1. Geometrically undefended: queen on e4 and rook on d2. Check for tactical protection.

Previous move: 32.Qe4. Gold borders mark its start and finish.

32...b3 33. axb3 Qxd2

32...b3 The pawn moves from b4 to b3. The changed line means the queen on a5 attacks the rook on d2. Recorded reply: **33.axb3**.

33...Qxd2 The queen captures the rook on d2.

At the end, nominal material is White 20 / Black 23 (P=1, N/B=3, R=5, Q=9). Over this line, Black's balance changes by +4. Activity and king safety still affect the evaluation.

Using $P=1$, $N/B=3$, $R=5$, $Q=9$, how much does Black's material balance change over the complete line? **Answer:** +4: the balance goes from -1 to +3. Count promotions and every recapture, not just the first gain.

Choose the blocker's destination carefully. An uncovered attack may fail if the opponent has a stronger check or can capture the slider.
