

Trapping a piece: White, move 17

Trapping a piece

White to move

Previous move: 16...Qxg2. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

17. Bf3 Qxh1+ 18. Bxh1

17.Bf3 The bishop moves from e2 to f3. From f3 it attacks queen on g2 and rook on a8. Recorded reply: **17...Qxh1+**.

18.Bxh1 The bishop captures the queen on h1.

At the end, nominal material is White 31 / Black 28 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +4. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +4: the balance goes from -1 to +3. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

An attacked piece is not trapped if it can give check, trade itself favorably, or open an escape through a sacrifice.

WHAT THIS POSITION TEACHES

A trapped piece lacks safe retreat squares. Winning it usually requires restricting its routes before attacking it, or forcing it into a cage.

HOW TO LOOK

Trace every plausible escape square for the target, including captures and counterchecks. Then find the move that closes the remaining route.

The defending king is on g8. Geometrically undefended: bishop on d6 and queen on g2. Check for tactical protection.
