

Trapping a piece: White, move 18

Trapping a piece

White to move

Previous move: 17...Kh8. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

18. Bg5 Qxg5 19. Rxg5

18.Bg5 The bishop moves from c1 to g5. From g5 it attacks queen on h4 and knight on f6. Recorded reply: **18...Qxg5**.

19.Rxg5 The rook captures the queen on g5.

At the end, nominal material is White 28 / Black 24 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +6. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +6: the balance goes from -2 to +4. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

An attacked piece is not trapped if it can give check, trade itself favorably, or open an escape through a sacrifice.

WHAT THIS POSITION TEACHES

A trapped piece lacks safe retreat squares. Winning it usually requires restricting its routes before attacking it, or forcing it into a cage.

HOW TO LOOK

Trace every plausible escape square for the target, including captures and counterchecks. Then find the move that closes the remaining route.

The defending king is on h8. Geometrically undefended: queen on h4. Check for tactical protection.
