

Trapping a piece: Black, move 28

Trapping a piece

Black to move

Previous move: 28.Ne4. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

28...c4 29. Ba4 b5 30. Bxb5 axb5

28...c4 The pawn moves from c5 to c4. Recorded reply: **29.Ba4**.

29...b5 The pawn moves from b6 to b5. Recorded reply: **30.Bxb5**.

30...axb5 The pawn captures the bishop on b5.

At the end, nominal material is White 16 / Black 18 (P=1, N/B=3, R=5, Q=9). Over this line, Black's balance changes by +2. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does Black's material balance change over the complete line? **Answer: +2:** the balance goes from +0 to +2. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

An attacked piece is not trapped if it can give check, trade itself favorably, or open an escape through a sacrifice.

WHAT THIS POSITION TEACHES

A trapped piece lacks safe retreat squares. Winning it usually requires restricting its routes before attacking it, or forcing it into a cage.

HOW TO LOOK

Trace every plausible escape square for the target, including captures and counterchecks. Then find the move that closes the remaining route.

The defending king is on g1. Geometrically undefended: rook on a1. Check for tactical protection.
