

Trapping a piece: Black, move 11

Trapping a piece

Black to move

Previous move: 11.a4. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

11...Bg4 12. Bh3 Bxh5 13. Bxd7+ Kxd7

11...Bg4 The bishop moves from e6 to g4. Recorded reply: **12.Bh3**.

12...Bxh5 The bishop captures the queen on h5. The changed line means the queen on d7 attacks the bishop on h3. Recorded reply: **13.Bxd7+**.

13...Kxd7 The king captures the bishop on d7.

At the end, nominal material is White 27 / Black 27 (P=1, N/B=3, R=5, Q=9). Over this line, Black's balance changes by +3. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does Black's material balance change over the complete line? **Answer:** +3: the balance goes from -3 to +0. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

An attacked piece is not trapped if it can give check, trade itself favorably, or open an escape through a sacrifice.

WHAT THIS POSITION TEACHES

A trapped piece lacks safe retreat squares. Winning it usually requires restricting its routes before attacking it, or forcing it into a cage.

HOW TO LOOK

Trace every plausible escape square for the target, including captures and counterchecks. Then find the move that closes the remaining route.

The defending king is on e1. Geometrically undefended: queen on h5 and bishop on g2. Check for tactical protection.
