

# Trapping a piece: Black, move 31

Trapping a piece

Black to move

Previous move: 31.Ne6. Gold borders mark its start and finish.

**WORKED CONTINUATION - COVER THIS SECTION FIRST**

**31...f4 32. Qxf7+ Kxf7**

**31...f4** The pawn moves from f5 to f4. The changed line means the bishop on d3 attacks the queen on g6. Recorded reply: **32.Qxf7+**.

**32...Kxf7** The king captures the queen on f7.

At the end, nominal material is White 17 / Black 21 (P=1, N/B=3, R=5, Q=9). Over this line, Black's balance changes by +4. Activity and king safety still affect the evaluation.

## CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does Black's material balance change over the complete line? **Answer: +4:** the balance goes from +0 to +4. Count promotions and every recapture, not just the first gain.

## CARRY THE IDEA INTO YOUR GAMES

An attacked piece is not trapped if it can give check, trade itself favorably, or open an escape through a sacrifice.

## WHAT THIS POSITION TEACHES

A trapped piece lacks safe retreat squares. Winning it usually requires restricting its routes before attacking it, or forcing it into a cage.

## HOW TO LOOK

Trace every plausible escape square for the target, including captures and counterchecks. Then find the move that closes the remaining route.

The defending king is on a1. Geometrically undefended: queen on g6 and bishop on d2. Check for tactical protection.
