

Kingside attacks: Black, move 23

Kingside attacks

Black to move

Previous move: 23.Rab1. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

23...Qxf2+ 24. Kh1 Qxg2#

23...Qxf2+ Check restricts White to 1 legal reply here. From f2 it attacks king on g1 and knight on f3. Recorded reply: **24.Kh1**.

24...Qxg2# Mate: queen on g2 gives check; White has no legal reply.

The line ends in checkmate against the king on h1. Material gain is unnecessary once no legal defense exists.

CHECKPOINT

Which piece delivers the final check, and why can the defender not continue? **Answer:** Queen on g2. The king is in check and the position has zero legal replies.

CARRY THE IDEA INTO YOUR GAMES

Do not count distant pieces as attackers unless they can reach useful squares in time. Every preparatory move gives the defender a turn.

WHAT THIS POSITION TEACHES

A kingside attack succeeds when pieces and pawn breaks create concrete threats near the king. The attack must arrive before the defender can exchange attackers or counter in the center.

HOW TO LOOK

Count the pieces that can join immediately, identify an entry square, and calculate the defender's checks and exchanges.

The defending king is on g1. Absolute pin: pawn on f2.
