

Kingside attacks: Black, move 16

Kingside attacks

Black to move

Previous move: 16.Kh1. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

16...Qf4 17. Qxf3 Qxf3+

16...Qf4 The queen moves from f6 to f4. Recorded reply: **17.Qxf3**.

17...Qxf3+ Check restricts White to 1 legal reply here. From f3 it attacks king on h1 and bishop on c3.

At the end, nominal material is White 21 / Black 26 (P=1, N/B=3, R=5, Q=9). Over this line, Black's balance changes by +6. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does Black's material balance change over the complete line? **Answer:** +6: the balance goes from -1 to +5. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

Do not count distant pieces as attackers unless they can reach useful squares in time. Every preparatory move gives the defender a turn.

WHAT THIS POSITION TEACHES

A kingside attack succeeds when pieces and pawn breaks create concrete threats near the king. The attack must arrive before the defender can exchange attackers or counter in the center.

HOW TO LOOK

Count the pieces that can join immediately, identify an entry square, and calculate the defender's checks and exchanges.

The defending king is on h1. Geometrically undefended: bishop on c4 and bishop on c3. Check for tactical protection.
