

Kingside attacks: White, move 20

Kingside attacks

White to move

Previous move: 19...Rf6. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

20. Qh7+ Kf8 21. Bh6 Bxh6 22. Rxh6

20.Qh7+ Check restricts Black to 1 legal reply here. From h7 it attacks king on g8 and bishop on g7. Recorded reply: **20...Kf8**.

21.Bh6 The bishop moves from e3 to h6. Recorded reply: **21...Bxh6**.

22.Rxh6 The rook captures the bishop on h6.

At the end, nominal material is White 29 / Black 31 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +0. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +0: the balance goes from -2 to -2. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

Do not count distant pieces as attackers unless they can reach useful squares in time. Every preparatory move gives the defender a turn.

WHAT THIS POSITION TEACHES

A kingside attack succeeds when pieces and pawn breaks create concrete threats near the king. The attack must arrive before the defender can exchange attackers or counter in the center.

HOW TO LOOK

Count the pieces that can join immediately, identify an entry square, and calculate the defender's checks and exchanges.

The defending king is on g8. Geometrically undefended: bishop on b7. Check for tactical protection.
