CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does Black's material balance change over the complete line? **Answer:** +0: the balance goes from -3 to -3. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

The board's left half is not inherently safe. Queen checks and rook entries can make a queenside king as vulnerable as a kingside one.

WHAT THIS POSITION TEACHES

An attack on the queenside can target a castled king, a vulnerable pawn, or trapped pieces. Files and entry squares matter more than simply advancing flank pawns.

HOW TO LOOK

Locate the critical target and which pawn or piece move opens a route toward it. Check whether central counterplay interrupts the plan.

The defending king is on b1. Geometrically undefended: rook on h1. Check for tactical protection.
