

Queenside attacks: White, move 36

Queenside attacks

White to move

Previous move: 35...g4. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

36. Bxb6 cxb6 37. Rxb6+

36.Bxb6 The bishop captures the pawn on b6. Recorded reply: **36...cxb6**.

37.Rxb6+ Check restricts Black to 3 legal replies here. The move also takes the pawn on b6.

At the end, nominal material is White 27 / Black 29 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by -1. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** -1: the balance goes from -1 to -2. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

The board's left half is not inherently safe. Queen checks and rook entries can make a queenside king as vulnerable as a kingside one.

WHAT THIS POSITION TEACHES

An attack on the queenside can target a castled king, a vulnerable pawn, or trapped pieces. Files and entry squares matter more than simply advancing flank pawns.

HOW TO LOOK

Locate the critical target and which pawn or piece move opens a route toward it. Check whether central counterplay interrupts the plan.

The defending king is on b8. Absolute pin: pawn on b6.
