

Queenside attacks: Black, move 30

Queenside attacks

Black to move

Previous move: 30.Qxd7. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

30...Nxb4 31. axb4 Qxb4+

30...Nxb4 The knight captures the pawn on b4. Recorded reply: **31.axb4**.

31...Qxb4+ Check restricts White to 2 legal replies here. The move also takes the pawn on b4.

At the end, nominal material is White 27 / Black 24 (P=1, N/B=3, R=5, Q=9). Over this line, Black's balance changes by -1. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does Black's material balance change over the complete line? **Answer:** -1: the balance goes from -2 to -3. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

The board's left half is not inherently safe. Queen checks and rook entries can make a queenside king as vulnerable as a kingside one.

WHAT THIS POSITION TEACHES

An attack on the queenside can target a castled king, a vulnerable pawn, or trapped pieces. Files and entry squares matter more than simply advancing flank pawns.

HOW TO LOOK

Locate the critical target and which pawn or piece move opens a route toward it. Check whether central counterplay interrupts the plan.

The defending king is on b1. Absolute pin: pawn on b4.
