

Promotion combinations: White, move 53

Promotion combinations

White to move

Previous move: 52...Rf7. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

53. d8=Q Rxc7 54. Qxc7+

53.d8=Q The pawn moves from d7 to d8. The pawn becomes a queen. The changed line means the queen on c7 attacks the rook on f7. Recorded reply: **53...Rxc7**.

54.Qxc7+ Check restricts Black to 6 legal replies here. The move also takes the rook on c7.

At the end, nominal material is White 16 / Black 14 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +4. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +4: the balance goes from -2 to +2. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

Always inspect stalemate and underpromotion resources. A queen is usually strongest, but the exact position determines the choice.

WHAT THIS POSITION TEACHES

An advanced pawn can turn a tactical sequence into a new queen or another useful piece. Promotion may occur with capture or check, and the choice of piece can change the outcome.

HOW TO LOOK

Calculate the pawn's route, the safety of the promotion square, and whether the new piece can survive or give a decisive check.

The defending king is on g7. Look for a defender that can be displaced or overloaded.
