

Promotion combinations: White, move 28

Promotion combinations

White to move

Previous move: 27...Qd5. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

28. Qxd5 Rxd5 29. bxa7 Kc7 30. a8=Q

28.Qxd5 The queen captures the queen on d5. Recorded reply: **28...Rxd5**.

29.bxa7 The pawn captures the pawn on a7. Recorded reply: **29...Kc7**.

30.a8=Q The pawn moves from a7 to a8. The pawn becomes a queen. From a8 it attacks rook on d5 and bishop on f8.

At the end, nominal material is White 18 / Black 16 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +9. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +9: the balance goes from -7 to +2. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

Always inspect stalemate and underpromotion resources. A queen is usually strongest, but the exact position determines the choice.

WHAT THIS POSITION TEACHES

An advanced pawn can turn a tactical sequence into a new queen or another useful piece. Promotion may occur with capture or check, and the choice of piece can change the outcome.

HOW TO LOOK

Calculate the pawn's route, the safety of the promotion square, and whether the new piece can survive or give a decisive check.

The defending king is on c8. Geometrically undefended: rook on h8. Check for tactical protection.
