

Rook-ending tactics: White, move 55

Rook-ending tactics

White to move

Previous move: 54...Rf5. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

55. Rxf5 Kxf5 56. Ke2 f1=Q+ 57. Kxf1

55.Rxf5 The rook captures the rook on f5. Recorded reply: **55...Kxf5**.

56.Ke2 The king moves from d3 to e2. Recorded reply: **56...f1=Q+**.

57.Kxf1 The king captures the queen on f1.

At the end, nominal material is White 2 / Black 2 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +1. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +1: the balance goes from -1 to +0. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

A routine rook placement can miss a skewer or promotion with check. Let concrete tactics override a guideline when they conflict.

WHAT THIS POSITION TEACHES

Rook endings combine pawn races with checks, cutoffs, and promotion tactics. Activity is vital, but the exact move order often decides whether a pawn can advance safely.

HOW TO LOOK

Check the kings' exposure, the rooks' checking distance, and the passed pawns. Calculate forcing checks before applying a general rook-ending rule.

The defending king is on g4. Look for a defender that can be displaced or overloaded.
