

Rook-ending tactics: White, move 44

Rook-ending tactics

White to move

Previous move: 43...e3. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

44. fxe3 fxe3 45. Rc3

44.fxe3 The pawn captures the pawn on e3. Recorded reply: **44...fxe3**.

45.Rc3 The rook moves from c7 to c3.

At the end, nominal material is White 8 / Black 8 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +0. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +0: the balance goes from +0 to +0. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

A routine rook placement can miss a skewer or promotion with check. Let concrete tactics override a guideline when they conflict.

WHAT THIS POSITION TEACHES

Rook endings combine pawn races with checks, cutoffs, and promotion tactics. Activity is vital, but the exact move order often decides whether a pawn can advance safely.

HOW TO LOOK

Check the kings' exposure, the rooks' checking distance, and the passed pawns. Calculate forcing checks before applying a general rook-ending rule.

The defending king is on e6. Geometrically undefended: rook on b6. Check for tactical protection.
