

Pawn-ending calculation: White, move 36

Pawn-ending calculation

White to move

Previous move: 35...fxe5. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

36. fxe5 Kf7 37. Kf3 Ke6 38. Kf4

36.fxe5 The pawn captures the pawn on e5. Recorded reply: **36...Kf7**.

37.Kf3 The king moves from g2 to f3. Recorded reply: **37...Ke6**.

38.Kf4 The king moves from f3 to f4.

At the end, nominal material is White 6 / Black 6 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +1. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +1: the balance goes from -1 to +0. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

Do not enter a pawn ending because it looks simple. Rook-pawn exceptions and zugzwang can make a material advantage irrelevant.

WHAT THIS POSITION TEACHES

With only kings and pawns, a single tempo can reverse the result. Calculate opposition, capture routes, promotion races, and reserve pawn moves precisely.

HOW TO LOOK

Count actual king moves and pawn pushes, then include whose turn it is and whether promotion gives check.

The defending king is on g7. Look for a defender that can be displaced or overloaded.
