

Pawn-ending calculation: White, move 51

Pawn-ending calculation

White to move

Previous move: 50...Kxb4. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

51. a6 f2 52. Ke2 Kc5 53. a7

51.a6 The pawn moves from a5 to a6. Recorded reply: **51...f2**.

52.Ke2 The king moves from d3 to e2. Recorded reply: **52...Kc5**.

53.a7 The pawn moves from a6 to a7.

At the end, nominal material is White 1 / Black 2 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +0. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +0: the balance goes from -1 to -1. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

Do not enter a pawn ending because it looks simple. Rook-pawn exceptions and zugzwang can make a material advantage irrelevant.

WHAT THIS POSITION TEACHES

With only kings and pawns, a single tempo can reverse the result. Calculate opposition, capture routes, promotion races, and reserve pawn moves precisely.

HOW TO LOOK

Count actual king moves and pawn pushes, then include whose turn it is and whether promotion gives check.

The defending king is on b4. Look for a defender that can be displaced or overloaded.
