

Pawn-ending calculation: Black, move 48

Pawn-ending calculation

Black to move

Previous move: 48.Kg2. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

48...Kg4 49. Kf2 Kh3 50. Kf3 h5 51. Kf2 Kh2

48...Kg4 The king moves from h5 to g4. Recorded reply: **49.Kf2**.

49...Kh3 The king moves from g4 to h3. Recorded reply: **50.Kf3**.

50...h5 The pawn moves from h6 to h5. Recorded reply: **51.Kf2**.

51...Kh2 The king moves from h3 to h2.

At the end, nominal material is White 3 / Black 3 (P=1, N/B=3, R=5, Q=9). Over this line, Black's balance changes by +0. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does Black's material balance change over the complete line? **Answer: +0**: the balance goes from +0 to +0. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

Do not enter a pawn ending because it looks simple. Rook-pawn exceptions and zugzwang can make a material advantage irrelevant.

WHAT THIS POSITION TEACHES

With only kings and pawns, a single tempo can reverse the result. Calculate opposition, capture routes, promotion races, and reserve pawn moves precisely.

HOW TO LOOK

Count actual king moves and pawn pushes, then include whose turn it is and whether promotion gives check.

The defending king is on g2. Look for a defender that can be displaced or overloaded.
