

Pawn-ending calculation: White, move 47

Pawn-ending calculation

White to move

Previous move: 46...a5. Gold borders mark its start and finish.

WORKED CONTINUATION - COVER THIS SECTION FIRST

47. bxa5 48. g4 Kf6 49. Kd5

47.bxa5 The pawn captures the pawn on a5. Recorded reply: **47...bxa5**.

48.g4 The pawn moves from g3 to g4. Recorded reply: **48...Kf6**.

49.Kd5 The king moves from e4 to d5.

At the end, nominal material is White 3 / Black 3 (P=1, N/B=3, R=5, Q=9). Over this line, White's balance changes by +0. Activity and king safety still affect the evaluation.

CHECKPOINT

Using P=1, N/B=3, R=5, Q=9, how much does White's material balance change over the complete line? **Answer:** +0: the balance goes from +0 to +0. Count promotions and every recapture, not just the first gain.

CARRY THE IDEA INTO YOUR GAMES

Do not enter a pawn ending because it looks simple. Rook-pawn exceptions and zugzwang can make a material advantage irrelevant.

WHAT THIS POSITION TEACHES

With only kings and pawns, a single tempo can reverse the result. Calculate opposition, capture routes, promotion races, and reserve pawn moves precisely.

HOW TO LOOK

Count actual king moves and pawn pushes, then include whose turn it is and whether promotion gives check.

The defending king is on e6. Look for a defender that can be displaced or overloaded.
